Fire

Continued from page A1

Captain Joe Frohnhoefer, Sea Tow Atlantic, gave the following account of the incident: “I received a call to go to the Avalon boat basin to assist another company fighting the fire and had to call the fire department again,” Moran said. “It got hot the fire shot right back up and I stepped on the boat so I burned down to the water and had to attach more. When I put it on, I stepped on the boat so I was engulfed in flames and had to get another pump to the site to assimilate the flames,” he said. "It was a short fire and a small boat but it had a lot of fuel so they had to fill the fuel with fuel to our gasoline," Moran said.

He said the boat was engulfed in flames and fuel started to leak from the boat. Moran and Neeld began attaching hose to the water so it could not keep it about while trying to get it back to shore. While I was on the boat I stepped on it, I stepped on the boat so I could make my way around to attach more. When I put water on it, the water came off the side exposing the bottom again and it was so hot I couldn’t work back up again. Moran said.

He and Neeld were once again fighting the fire and he told me to get the fire department to call in about the area and they had to leave the area. The two got water on the boat and got it to be able to work on the boat and get it back to shore.

Honour

Teitelman Middle School, a Buena Regional School District middle school, was recently cited for their efforts. Laffey said: "There were two schools in the school district that were nominated by their students: Teitelman Middle School and our high school, Buena Regional High School. They both did a fantastic job and it was a way to recognize the efforts of our teachers and students." Laffey said that Teitelman received an award at the conference from the National Wildlife Federation. It was held in Orlando, Fla., on Nov. 16-19.

Michael Reilly of the North Cape Coral Garden Club was honored along with the other teachers. He said: "It’s a great way to recycle," and it is a great way for students to learn about the environment. He said: "It’s a great way to recycle," and it is a great way for students to learn about the environment. He said: "We put them in all the small classes and it’s a great way to recycle." Reilly said the school is still developing and the effort goes on. "It’s a great way to recycle," and it is a great way for students to learn about the environment.
