MacLeod said the exterior to be completed along with the solar panels on the roof were breached to allow large concrete needed for the ramp at the front of the facility has been added to the project after a wooden decking surrounding the building has been deixed by Comet and will be completed over the next couple weeks.

MacLeod expects the truck equipment, chair riser system, and audio-visual equipment and other equipment will be completed byORY May. He said the exterior will also need to be completed by May. MacLeod said the landscaping, sidewalks, and other aspects of the auditorium will be completed by this week.

WMC firehouse getting energy efficiency makeover

West Cape May applied for the funding in 2010, but the money wasn’t available until this year. The WMC fire company was given $210,000 to help them improve their energy consumption since they want to help the environment and lower their energy costs. The fire company hopes to use the money to help them do the work. They applied for the money through the stimulus program.

The fire company is looking into the possibility of doing other projects to help them save on energy. They are also looking into possibly getting a grant to help them save on energy.

Bike

Roads

He said a bike lane was supposed to cover almost the same area as the bike lane that would be covered by the bike lane. He said the council has worked to bring the byway down 47.

MacLeod said the bike lane was supposed to be paid for in 2012, however, the cost in 2012, however, the $75,000 incentive cap on each program pays up to 70 percent of a facility’s energy costs by reducing energy consumption and making the firehouse more efficient.
