City begins planning desal plant expansion

By JACOB FICHTER
CAPE MAY — City Council took the first step to expanding the city’s desal plant, a project expected to cost in the millions.

During a meeting April 20, council awarded a $39,241 contract to CME Associates for professional engineering services to provide a joint project plan for expansion of the location, a state-of-the-art plant and water infrastructure improvements.

The proposal notes a 500-year storm event must be considered, the area where the expansion will be located must be a 100-year floodplain and other requirements, $13,487 working with a grant writer.
