Coast Guard: No new recruiting to boot camp

The Coast Guard says in a statement that it will gradually reduce new recruits to boot camp at the Training Center Cape May (TRACEN), but it will not immediately begin to cut back on new recruits to best combat the COVID-19 emergency.

The graduates will be heading to stations, cutters, and other Coast Guard units under the direction of the Commandant of the Coast Guard.

John G. Voloshin, the marketing and sales manager of the Cape May Star and Wave, said everyone understands health and safety of our personnel is our priority.”

Voloshin, the marketing and sales manager of the Cape May Star and Wave, said everyone understands the need to reduce exposure to the virus.

As of Monday afternoon, there were 99 cases in Cape May County. As of April 2, 93, that is the only facility related to CVID-19 in Atlantic County.

Some previous measures include daily meals at the facility, which residents are to eat in their rooms with no visitors. Aside from staff, the only other people allowed in the building are medical personnel, individually packaged meals to reduce contact, increased cleaning of all facilities after usage, and the reduction of some training events after consultation with medical personnel.

This effort is to continue until conditions improve.
