The 2022-23 budget uses $2.9 million in capital reserve, approved by the city council, to replace the police station that was built in the 1960s. The last police station remodeling was in 1980.

The $2.9 million budget was approved because the City Council was concerned about the negative perception of the old police station and the need for an updated station.

The new police station will be built on the site of the old one, and it will be designed to accommodate the growing needs of the police department. The new station will include more space for training and community outreach, as well as enhanced technology and equipment.

The construction of the new police station is expected to be completed within two years, and the city council is committed to ensuring that the new station is built to the highest standards of safety and security.
