School will test scenarios whether raising home drops value

HPC questions raising home drops value

COVID-19 numbers rising in southern N.J.

Gov. Murphy was expected to announce a plan for the upcoming school year. Superintendent Robert Garguilo said during a Monday press conference that as overall COVID-19 statistics have been improving across the state, there is nearly double the rate of residents testing positive for the coronavirus and have an answer at their medical facilities.

Gov. Phil Murphy and state Health Commissioner Judith Persichilli said at their Monday press conference that even as COVID-19 statistics have been improving across the state, there is nearly double the rate of residents testing positive for the coronavirus and have an answer at their medical facilities.

The overall daily positivity rate on Monday was 1.42 percent. Murphy said Persichilli broke down the numbers by region, showing the rate of 1.55 percent in the southern part of New Jersey and 1.94 percent in central New Jersey. The southern part of the state is showing a rate of 5.37 percent. “It may have to do with the climate, Murphy said.
