CAPE MAY — Eight architecture firms have submitted four to five different requests for proposals for a new public safety building.

Two firms are slated to be selected by the city council on September 5 for the design of the new public safety building.

The project was put on hold due to the lack of committee members on the council.

The city council has previously expressed interest in a new public safety building.

The project is expected to begin in early 2022 and be completed by the end of 2023.

City Manager Mike Horvath has stated that the city is looking for a firm that can provide a comprehensive and cost-effective design.

The city has received several proposals, and the council will select the two firms that best meet their needs.

The new public safety building will replace the current facility, which is located on Washington Street.

The new facility will be located on the former location of the Seaside Avenue Fire Station.

The city council has been working on this project for several years, and it has received support from the public.

The new building will include space for the fire department, police department, and emergency operations center.

The city council is expected to vote on the selection of the two firms in the coming weeks.

CAPE MAY — The three-year-old plan to create parking spaces on unused railroad tracks at the Welcome Center may finally be moving forward.

The project has been held up due to the lack of committee members on the council.

The city council has previously expressed interest in creating parking spaces on unused railroad tracks.

The project is expected to begin in early 2022 and be completed by the end of 2023.

City Manager Mike Horvath has stated that the city is looking for a firm that can provide a comprehensive and cost-effective design.

The city has received several proposals, and the council will select the two firms that best meet their needs.

The new public safety building will replace the current facility, which is located on Washington Street.
