CAPE MAY POINT — Borough Commissioners have moved a step closer to funding for various projects.

At an April 11 meeting, Commissioner Bob Mullock said the borough would be moving forward with a bond ordinance to fund projects.

“This year, we will be moving forward with a bond ordinance,” Mullock said.

The ordinance would be for the amount of $3.4 million in capital improvement projects for the next six years.

Mullock said the borough had $750,000 for public works in the 2019 budget and $750,000 for public works in the 2020 budget.

“I don’t see any reason we wouldn’t carry this for six years,” he said.

The $3.4 million in capital improvement projects includes $3 million in bonding and $400,000 in local funding.

Mullock said the projects would include a 10-year $75,000 annual anticipated grant for Pearl Avenue renovations.

The $827,000 balance is expected to be funded by the borough.

Capital improvements for Lake Lily, he said, would have a cost estimate of $220,500 with $100,000 in grant funding, leaving a balance of $120,500 for the borough, which was the amount Mullock was willing to spend.

Lake Lily engineering fees due at $20,000, were being funded by the borough from the 2019 to 2022 budget years.

The cost of all $75,000 in capital improvement projects for Lake Lily was $500,000 in grant funding.

Mullock said the borough would spend $100,000 anticipated grant for Pearl Avenue renovations, $127,000 with $100,000 in grant funding, leaving a balance of $27,000 for the borough, which was the amount Mullock was willing to spend.

The $827,000 balance is expected to be funded by the borough.
