VILLAS — Equipment is being mobilized to start construction of a pump station as part of the first phase of the Roscian Avenue project. Monday, engineer for Roscian Avenue project, said the contractor for the first phase of the project is bidding on a new pump station and a bypass pumping system. The Design-Build Partnership has been working with the borough to design the project and to investigate the feasibility of using a pump station to address flooding concerns. The project is expected to be completed in the fall of 2020. Residents are encouraged to attend the public hearing on the project on Tuesday, October 8, at 6:30 p.m. at Village Hall.
