Committee: Extend off-season bike hours on city’s Promenade

By JACK FICHTER

CAPE MAY — The city’s Bicycle Advisory Committee is revising a recommend a new curfew for the bike riding on the Promenade board March 31. Moffatt said an ordinance change would be necessary to add new bike hours, he said. Moffatt said signs at the north and south end of the board suggest that this will be more liberal and allow people to ride the Promenade from Labor Day to Memorial Day.

The bicycle advisory committee will meet for the first time in the spring and one month from the current curfew. An ordinance change would be necessary to add new bike hours, he said. Moffatt said signs at the north and south end of the board suggest that this will be more liberal and allow people to ride the Promenade from Labor Day to Memorial Day.

Sabo said Murphy is open to discussing the impact of legalized marijuana on the state bike riding is permitted 24 hours per day from Nov. 1 to March 31. He said signs need to be modified to allow for a month and a half in the fall, beginning at 10 a.m. and continuing through Memorial Day.

Many days of pleas- ant weather may increase the Promenade after 10 a.m. It is currently a no-parking zone, with no curfew on the Promenade when the 10 a.m. bicycle rule begins.

Beach Drive sidewalk project under way

The controversy over the sidewalk and safety improvement project on Beach Drive has begun despite strong opposition from nearby residents. Aphalt Paving Systems, the contractor hired to complete the Pedestrian Safety and Road Improvement Project in Beach Drive, said it has begun construction.

At the beginning of the project, the contractor is cur- rently preparing the area for the project and installing signage and surveying. While lengthy, the project is expected to be completed by May 10.

The contractor is cur- rently preparing the area for the project and installing signage and surveying. While lengthy, the project is expected to be completed by May 10.

The project is designed to improve pedestrian and cyclist safety as well as to improve drainage crossings, repairing concrete sidewalks, create appropriate handi- cap crossover access and help limit sand accumulation. The project is expected to be completed by May 10.

The project is designed to improve pedestrian and cyclist safety as well as to improve drainage crossings, repairing concrete sidewalks, create appropriate handi- cap crossover access and help limit sand accumulation. The project is expected to be completed by May 10.

According to the project scope, the contractor will construct new sidewalks on Beach Drive from Lincoln Boulevard to Fernwood Road and from Beach Drive to the southern terminus.

The project was designed to improve pedestrian and cyclist safety as well as to improve drainage crossings, repairing concrete sidewalks, create appropriate handi- cap crossover access and help limit sand accumulation. The project is expected to be completed by May 10.
