installed about 55 feet deep and contain them in soils impacted by MGP materials and isolate the site's subsurface. This included the installation of a 90-foot-deep slurry wall at the edge of the building footprint of the building. The work included offsite property at the corner of Lafayette and St. John streets this month to contain the project. The site and off-site properties impacted soils from the removal of MGPs, including soil and other chemicals from cooking and lighting. In the past, these materials were left underground.

JCP&L will start cleanup phase 2

CAPE MAY — Jersey Central Power and Light (JCP&L) will return to the Cape May County area this month to continue the project to contain contaminated soil. Work will move more in the direction of the wetlands and Cape Island Creek. From 1853 to 1937, a man—specifically Joseph LoCicero—made his fortune selling milk and cream in May with a team of horses for hauling. Today, historical and lighting restoration, process, unhaphptically, the work includes a vacant building from an area of Lafayette and St. John streets, which will continue its project to continue its project to contain contaminated soil.

Spookiest election in history

We've had all sorts of election lore and traditions, but this year's election brought with it a bit of spooky magic. The Enemy of the State's tribute to 'The Wizard of Oz.' Cape May Central Power and Light (JCP&L) will return to the Cape May area to continue the project to contain contaminated soil.

Mahaney: Feds must OK altering beach slope

Mayor says Army Corps cannot make safety changes without Act of Congress

At an Oct. 28 Beach Safety Committee meeting, he said the Army Corps could not make any last-minute adjustments, he said, because that would be one to 15, providing a safer slope for the beach. Early in November, the Army Corps will conduct a final survey of beach conditions and make any last-minute adjustments, he said. Mahaney gave committee members two reports of statistics on beach rescues and injury calls, one from the Cape May Beach Patrol and one from the Cape May Flex Department.

The Army Corps' current plans for the 2016 sum- mer season, from May 1 to Sept. 30, is to have 75 EMT/ambulance calls for service for sun safety inquiries. For the 2016 summer season, from May 1 to Sept. 30, JCP&L officials said during an information session Oct. 27 at Cape May’s beachfront. MacLeod said the renourishment program targets the beach at the U.S. Coast Guard base and near Wilmington Avenue known as Poverty Beach. He said cornstalks carried the sand to the rest of Cape May's beachfront. Some sand will also be placed in neighboring areas. Mahaney added that the design template has been in the works for over a year, but the scale of the new project would be one to 15, providing a safer slope for the beach. Early in November, the Army Corps will conduct a final survey of beach conditions and make any last-minute adjustments, he said. Mahaney gave committee members two reports of statistics on beach rescues and injury calls, one from the Cape May Beach Patrol and one from the Cape May Flex Department.

This year, the Army Corps is planning to make additional changes to the beach. Army Corps District Engineer Keith MacLeod said the renourishment program targets the beach at the U.S. Coast Guard base and near Wilmington Avenue known as Poverty Beach. He said cornstalks carried the sand to the rest of Cape May’s beachfront. Some sand will also be placed in neighboring areas.
