VILLAS — The Lower Township Municipal Utilities Authority Commissioners authorized Remington Vernick & Wissahickon Engineers to proceed with the specifications for two new projects that will alleviate deteriorating pipe and bring sewer service to an area across from the county airport.

At a Dec. 3 meeting, engineer Marc Delhaan said specifications for sewer projects at Schellengers Landing and Warwick Shores are due in the coming weeks. Vernick will move ahead with the plans.

Delhaan explained the applications for the three projects have been submitted to the U.S. Department of Agriculture. The project will be in four phases at $3.5 million per phase.

“There were no questions on the application. We see it as a go ahead,” said Delhaan.

The program’s goal is to bring sewer service to an area across from the airport and where the existing septic systems are failing.

Delhaan said he said a 5.7 million project will bring water to East Villas. The application’s goal is to bring water main to 500 additional properties.

The trenching restoration project’s goal is to bring sewer service to an area across from the airport and where the existing septic systems are failing.

Trees for Troops delivers holiday cheer to Coasries
