Lower awaiting permit for work on Roseann Ave.

VILLAS — A major infrastructure project relating to flooding on Roseann Avenue in North Cape May is in the permitting process with the U.S. Army Corps of Engineers.

Steve Morey, a senior civil engineer, said he would not address details of the CAFRA application, but said he would then submit the CAFRA application to the Historic Preservation Commission, which would review the application.

“We’ve gone through the 30-year public comment period and we recorded every single comment,” Morey said. “We’ve already talked to the DEP and reviewed the comments with them.”

He said the plans had changed since the CAFRA application was submitted to the Department of Environmental Protection. "We’ve gone through the 30-year public comment period and we recorded every single comment," Morey said. "We’ve already talked to the DEP and reviewed the comments with them."
