Cape May can rake away beach scarps

DEP allows it for first time under Beach Maintenance Permit

CAPE MAY — The city has gotten permission to rake away steep slopes on the beach caused by storm damage. The city received its new Beach Maintenance Permit on Aug. 21, the committee that had it in the works for two years, and it allows the city to remove beach scarps, or steep slopes, along the beach.

The city has a few, steep slopes along a beach caused by wave erosion. Sharp drops-offs in the sand face are caused by rip tides, and they have the potential to cause people to be injured.

Cape May’s Beach Safety Committee made a recommendation to the city, which was added to the city’s West Cape May plan application to the DEP, that ramped up the beach in the city, said Police Capt. Dennis DeSatnick.

DeSatnick said Conley provided some general ideas for new construction on the current construction site of the new building.

DeSatnick said constructing a police building was more expensive than constructing a fire station, and it was a police building.

The contractor that was awarded the contract is Picard Construction Co. Inc., a local company.

A number of items are proposed for the building.

Chief Fiore said Picard provided a schedule of when it wants to do the work, which the city has reviewed and approved.

DeSatnick said Picard provided a schedule of what it wants to do in beach maintenance, and the city just had to be specific about what it wanted to do in beach maintenance after a storm.

He said the permit did not cost the city a cent, and the city did not cost the taxpayers a dime.
