The township will assist the MUA by paying for grants through the use of the Township
Grant Committee. This will be more successful than the grants currently done, accord-
ing to O’Connor. “The community is ready to em-
ploy the MUA property. This will be the key to our
financial future.”

The township, O’Connor said, will work with the
MUA to improve the property and promote the use
of the MUA property. This will include making
the property more accessible to the public.

The proposed fee schedule will provide for a
maximum of $10,000 per year for the use of the
MUA property. This amount will be paid to the
MUA for the use of the property. The MUA will
then use this money to improve the property and
promote its use.

The proposed fees will also include a charge for
the use of the MUA property. This charge will
be paid by the township and will be used to cover
the cost of maintaining the property.

The proposed fees will be reviewed by the MUA
and the Township Committee. The MUA will
then be responsible for implementing the fees.

The township and the MUA will work together
to ensure that the MUA property is used to its
full potential.

The township will also assist the MUA by paying
for grants through the use of the Township
Grant Committee. This will be more successful
than the grants currently done, according to
O’Connor. “The community is ready to employ
the MUA property. This will be the key to our
financial future.”
