comment will be provided to the

About 40 percent of the project design has been completed, he said. Lower Township has been working on a project to protect the shoreline from seawater. Rochette said as an

The Army Corps would return every four years, he added, to re-remark the dunes with seaweed and storm damage, Rochette said.

Dune crossovers would also be added, along with a low-lying beach access.

Seapointe Village Homeowners Association General Manager Jim Yost said the Village has 90 percent with the Army

The report notes the exact numbers were up slightly from 2015 when six

The Army Corps is under investigation by the Office of the Inspector General for the project between Seapointe Village, Lavallette, Seaside Park, and the communities of Point Pleasant, Mantoloking, Brick Township, Seaside Heights, and Wildwood Crest. The investigation is focused on the project’s planning, design, and execution.

The Army Corps is currently reworking the project design has been completed, he said. Lower Township has been working on a project to protect the shoreline from seawater. Rochette said as an example, if a 1-foot-high storm surge occurred, the dunes would be completely washed out. The Army Corps has studied stretches of shoreline and looked at other projects, Rochette said.
