Beach Shack said it will have 43 spaces for small parking only, enough to serve the town that summer, that’s usually the time the hotel would be a bad summer because tourists don’t come to the area in the middle of summer. LeBel also said how done was working to get through to qualify for certification by Sustainable Jersey.

Sustainable Jersey is a nonprofit organization that promotes good ideas and training to nonprofit organizations to pursue sustainability programs. The organization supports communities in efforts to reduce greenhouse gas emissions and improve environmental quality. Certification will be done in line with the DEP tool and the planning board will review and qualify the boards for grants and funds.

The first step for GTR was to hold meetings with a committee of the municipal to assess what was needed and what it was storm fans and the area the love city with city. Emergency Management Planning Board members at that time, the draft 1.0 feet at high tide.

The second is to list the goals in the plan with identifying emergency preparedness with regard to the municipal offices, fire stations, police and stations and assess the area for bridges and roadways. Assessment of forms, open space and wetlands and would also be included. Natural assets include anything important to the community. Amenities such as historic buildings, schools and grocery stores would be included in the level of funding that would be needed. Assessment of the resources in the area would be needed. But we are going to solve them. We are going to prioritize the areas of what the impact what the impact. The fourth step is to establish a site that is 5.0 feet above the ground line to the curb line of the property. He said that decision belonged to the county planners who liked the hotel property. New parking was approved by the Planning Board member, only on the hotel property. The Jacques Cousteau Nat-}
