Car hits bicyclist on bridge in Lower Township

The city now will have to use a bull dozer to flatten out beach scarps, such as the one above, which are created by heavy wave action during storms. In previous years, the city had to seek special permits to do the work, costing time and money. The city now will be able to use a bull dozer to flatten out beach scarps, such as the one above, which are created by heavy wave action during storms. In previous years, the city had to seek special permits to do the work, costing time and money.
