**Problems**

Continued from Page A1

The cleaning of the roof of Convention Hall is a major undertaking that contains many individual projects. Each project requires a team of workers to complete the job. The roof is divided into sections, and each section is assigned to a specific team. The teams work together to clean the roof and ensure that it is free from debris and dirt. The teams use various tools and equipment to complete the job, including ladders, power washers, and vacuums.

**Exterior Condition**

The roof of Convention Hall is in need of repair. There are cracks and holes in the concrete that need to be repaired. The roof also needs to be coated to prevent oxidation. The coating will help to protect the roof from wind-driven rain and ultraviolet light.

**Internal Condition**

The interior of Convention Hall is also in need of repair. There are cracks in the concrete floor near a storage room. The cracks need to be repaired to prevent water from seeping through.

**Conclusion**

The cleaning of the roof of Convention Hall is a major undertaking that requires the coordination of many teams and workers. The teams work together to clean the roof and ensure that it is free from debris and dirt. The roof also needs to be coated to prevent oxidation, and the interior needs to be repaired to prevent water from seeping through.

**Questions for Controversy**

1. What is the significance of the roof of Convention Hall?
2. Why is the roof of Convention Hall in need of repair?
3. What are the steps required to clean the roof of Convention Hall?
4. What is the purpose of coating the roof of Convention Hall?
5. What is the significance of the interior condition of Convention Hall?
